

THE ABSOLUTE SOUND PRODUCT OF THE YEAR

We are honored that the MBL 126 is The Absolute Sound's Product of the Year for stand-mount loudspeakers. Many thanks to The Absolute Sound for the recognition.

Radialstrahler 126

Musicality, transparency, and astounding spatiality underscore the brilliant MBL 126 Radialstrahler. The sonics of this omnidirectional stand-mount were characterized by sweeping ambience retrieval and 3D-like immersion and orchestral layering. Top-to-bottom response was seamless. As only an omni can, it approaches the complex relationship between imaging, sound staging, and envelopment in ways direct-radiating transducers often only hint at by rarely attain. Symphonic music assumes a naturalism and spine-tingling immediacy akin to the real thing. Low-level resolution and sensitivity to dynamic gradients abound. As a four-driver three-way, credit the superb carbon-fiber, radial mid and tweeter for spinning the sonic silk. Both are grainless, airy, and harmonious. Like all MBL products, the 126 is crafted and finished with extreme precision and taste. Though small of footprint, the MBL 126 makes a truly grand statement—grand enough to earn our 2021 Stand-Mount Loudspeaker of the Year Award.
